

Taking the Lid off the Water Table

Action Plan

Health and safety. List the steps you will take to ensure children's health and safety.

A few important rules. Describe how you will involve children in setting a few important guidelines for using the water table and list the rules you are likely to need.

Logistics. Plan where you will locate the water table; when you will have it available; how you could involve children in changing the water daily; where you will get and then store waterproof smocks; and any other arrangements to make water play a success.
