

Spotlight on Young Children and **MATH**

Each issue of *Young Children*, NAEYC's award-winning journal, includes a cluster of articles on a topic of special interest and importance to the early childhood community. Most of the selections in this book originally appeared in *Young Children* Vol. 58, No. 1 in the cluster titled Teaching and Learning about Math. Others come from Beyond the Journal (www.naeyc.org), an online collection of resources that complement and expand on articles found in the journal, and from books that NAEYC has published or copublished.

Through its publications program the National Association for the Education of Young Children (NAEYC) provides a forum for discussion of major issues and ideas in the early childhood field, with the hope of provoking thought and promoting professional growth. The views expressed or implied are not necessarily those of the Association. NAEYC thanks the contributors.
