## Early Childhood Educators and Families Face Rising Challenges as Relief Funds Expire

February 2024

### RHODE ISLAND

**The problems are clear:** As federal investments that have sustained the child care and early education sector expire, the structural challenges that have always plagued the sector have remained and grown. Program costs are rising, staff burnout and turnover remains high as wages remain too low, and already stretched families are having to pay more for the care they need. The result of these challenges is a reduced supply of high-quality care that everyone in our society—from families, to businesses, to communities—relies on to be successful.

**The solutions remain clear:** Public investments in child care and early learning remain necessary to build an early childhood education system that works. Congress should follow the example of the 11 states and District of Columbia that have invested new and significant state funding to support early childhood educators and stronger state systems by passing robust, sustained investments that ensure programs and educators have the support they need to provide high quality care for all families with young children.

In January 2024, more than 10,000 early childhood educators (ECE) from all states and settings—including centers, family child care homes, faith-based programs, Head Start, and public preschool programs—responded to a new ECE field survey from NAEYC. The survey results and accompanying stories illustrate the ongoing challenges facing this field, the exhaustion of providers, the clear benefits of public funding, and the need for additional support following the loss of federal funding that helped stabilize the sector before it expired in September 2023.

### Here are some reflections from survey respondents in RI (Rhode Island):

*“The cost of everything gone up, yet tuition really cannot because then families will not be able to attend” - Director/Administrator*

*“My program is a non-for-profit organization, so we are on a strict budget. Salary is low and retention is low. We are losing great staff members because the pay is so low.” - Early Childhood Educator*

*“It is incredibly stressful. We have multiple staff call out just about every day, and we cannot find good staff because the work is challenging and the pay in the ECE field in general is terrible. I worry every single night about paying my bills and furthering my education. I want to start a family and can’t, largely due to the insultingly low pay ECE teachers get. It’s heartbreaking.” - Early Childhood Educator*

## Here's a brief summary of the survey data from RI (Rhode Island):

	STATE	NATIONAL
<b>Total sample size</b>	<b>189</b>	<b>10,128</b>
<b>Total employed in family child care homes</b>	<b>20</b>	<b>1,450</b>
<b>Total employed in child care centers</b>	<b>124</b>	<b>5,084</b>
<b>AMONG ALL RESPONDENTS:</b>		
Supply		
% reporting at least one child care program in their community OPENING over the last year	<b>24%</b>	<b>30%</b>
% reporting at least one child care program in their community CLOSING over the last year	<b>45%</b>	<b>55%</b>
<b>Compared to this time last year...</b>		
% indicating they are more burned out now	<b>50%</b>	<b>46%</b>
% indicating their economic situation has improved	<b>14%</b>	<b>16%</b>
% indicating their economic situation has worsened	<b>38%</b>	<b>32%</b>
<b>Total sample of center directors and family child care owner/operator respondents working in child care centers and family child care homes</b>		
	<b>46</b>	<b>3,815</b>
<b>AMONG CHILD CARE CENTER DIRECTORS AND FAMILY CHILD CARE OWNER/OPERATORS:</b>		
<b>Over the last 6 months...</b>		
Supply		
% indicating their program was under-enrolled relative to capacity in the last 6 months	<b>59%</b>	<b>56%</b>
% indicating that they raised tuition	<b>37%</b>	<b>48%</b>
Staffing		
% indicating their program is experiencing a staffing shortage	<b>51%</b>	<b>53%</b>
% indicating that they raised wages	<b>51%</b>	<b>51%</b>
Costs		
% indicating their rent costs went up	<b>48%</b>	<b>36%</b>
% indicating their liability insurance costs went up	<b>60%</b>	<b>49%</b>
% indicating their property insurance costs went up	<b>67%</b>	<b>53%</b>

**Methodology** This online survey, created and conducted by NAEYC using SurveyMonkey, represents the responses of a non-randomized sample of 11,154 individuals working in early childhood education settings who completed the survey in English or Spanish between January 8-22, 2024. To generate a more representative national sample from the pool of responses, a probability proportional to size (PPS) methodology was used to pull samples by state that are benchmarked to the share of the total early childhood workforce by state. These shares were calculated by the authors from the Bureau of Labor Statistics May 2022 Occupational Employment and Wage Statistics (Codes: 11-9031, 25-2011, 25-2051, 39-9011). The final sample size for the national-level analysis is 10,128. In contrast, for the state-level analysis, the entire sample of responses from each state were used. We are unable to supply detailed analysis in states for which there are very small sample sizes across sub-groups.

The survey links were shared widely through email newsletters, listservs, social media, and via partnerships, and 10 randomly selected respondents were provided with a \$100 gift card and another 10 randomly selected respondents were provided complimentary registration to NAEYC's February 2024 Public Policy Forum for participation in a sweepstakes. Given the constantly changing and widely varying nature of the crisis, the broad analysis from this survey is intended to present the experiences of the respondents, as captured in the moment that they take the survey, with extrapolations for the experiences of the field and industry at large.
